## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5 and 9-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 3, it is not clear what is being defined as “the axial direction of said base part”. The base part gives no geometry to define “axial direction”.

Lines 7-8, it is not clear what is being defined as “the turning direction of said arm”.

Line 10, “its” should be replaced with structural element.

Lines 12-13, it cannot be understood structurally what “lock part...engagement with the other end part” is meant. The disclosure shows the lock part engaging the “engagement part”, not “the other end part”.

Line 13, “located in said attachment position” is vague and indefinite since “position” is not a structure. For clarity, “located” should be deleted. Note similar error of lines 21-22.

Note that errors discussed above are also found in claim 9. Similar errors appearing in claim 9 will not be mentioned specifically.

In both claims 2 and 3, "longitudinal direction" is indefinite. Not geometry is given to define "longitudinal".

In claim 5, lines 2-4, "said lock part is caused...biasing means" cannot be understood.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: how the "lock retaining means" is structurally and functionally related to other elements of the hinge to perform "prevent said lock lever from turning".

In claim 10, "located in said lock position" is indefinite. "position" is not a physical structure.

In claim 11, line 2, "turnable member" seems to be "turning member". Note similar error in claim 12.

***Allowable Subject Matter***

3. Claims 1-5 and 9-13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

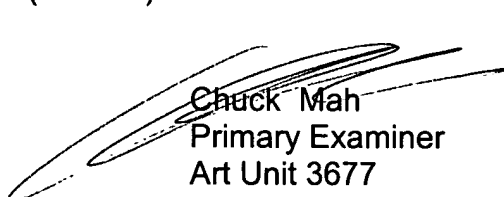

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
